## **RE: Oneida Energy Storage Project**

Further to Six Nations of the Grand River Development Corporation's last correspondence dated March 22, 2021, I am writing to provide a status update on the Oneida Energy Storage Project (OES Project).

The OES Project is advancing, and we are aiming to be commercially operational in early 2024. We can confirm that there have been no technical changes to the OES Project since our previous outreach.

Six Nations of the Grand River Development Corporation and NRStor Inc., are following up on our prior communication efforts (summary enclosed) and are available to discuss should you have any project related questions.

Kind regards,

Jason Rioux  
President  
Oneida Energy Storage LP  
jrioux@nrstor.com
