## **RE: Oneida Energy Storage Project**

Further to our letter dated January 12, 2021 and subsequent discussions, I am writing to provide an update on the Oneida Energy Storage Project (OES Project).

As you are aware, the OES Project is advancing rapidly, and we are still aiming to be commercially operational in early 2024. We are pleased that Mississaugas of the Credit Business Corporation has been engaged in discussions regarding potential equity ownership in the OES Project. We look forward to advancing and continuing those discussions.

We can confirm that there have been no technical changes to the OES Project since our previous outreach, however please contact me if you have any project related questions you wish to discuss.

Kind regards,

Jason Rioux  
President  
Oneida Energy Storage LP
