Invitation to Participate

Six Nations of the Grand River Economic Development Trust Recipients

Re: Community Investment Review- ITC Lake Erie Connector Project

I am writing today with a good mind, seeking important feedback on a project which we believe will provide value to our community.

Your organization has been successful in obtaining funding from the Six Nations of the Grand River Economic Development Trust (EDT). The EDT is funded by surplus profits generated by Six Nations of the Grand River Development Corporation (SNGRDC). To continue generating a profit to fund future EDT allocations, SNGRDC is continuously reviewing investment opportunities of benefit to the Six Nations Community.

We want to advise your organization about the upcoming Community Investment Review on the **ITC Lake Erie Connector Project**. The ITC Lake Erie Connector Project is a proposed 117 km, bi-directional, high-voltage direct current (HVDC), underwater electricity transmission line. The LEC would deliver 1,000 MW of power directly between Ontario and the largest electrical market in the world – 13 U.S. Midwestern and Mid-Atlantic states.

Six Nations of the Grand River Development Corporation will launch the community commentary period for this project on March 1, 2022. We will be sharing the merits of the proposed ITC Lake Erie Connector Project and offering an opportunity for our community to ask questions. These community focused sessions will continue until April 30, 2022. To remain transparent, we have engaged Dillon Consulting Limited who will facilitate this process.

We are extending an invitation to your organization to participate in the webinars listed below:

March 8 2:00pm	March 11 10:00am	March 21 7:00pm
March 23 6:00pm	March 30 2:00pm	April 5 10:00am
April 11 6:00pm	April 14 8:00pm	April 19 10:00am
April 20 6:00pm		

Project information, webinar registration, and more will be located at www.snfuture.com/projects/lec.

If you have any questions, please reach out via info@snfuture.com.

Many thanks,

Matt Jamieson
